Executive Briefing Center in Poughkeepsie - 

**13 Ottobre 2009**

Ore 9:30 - 11:00 Dipartimento di Informatica

Aula 4 - Palazzo delle Aule

Sono invitati studenti e docenti

## Executive Summary:

This presentation will discuss Linux Strategy:

- Why did IBM invest in Linux?
- What is Linux Technology Center?
- How does partnership with the open source development community work?
- Why is Linux a key building block within a dynamic infrastructure?
- How System z's extreme virtualization is allowing companies to save millions of dollars by consolidating over a thousand servers with Linux and System z.
- Why System z and Linux provide an extraordinary platform for cloud computing.

**Dennis Wunder** has worked in IBM for 30 years. He is currently an Executive IT Specialist in the Executive Briefing Center in Poughkeepsie and has been a briefing IBM's customers for the past 21 years in the world. Dennis is experienced in many areas including z/VM, z/OS, Linux, IBM Middleware, Networking, and desktop operating system. He explains the business value of new technologies with an easy to understand, common sense manner. He actually interacts with many IBM's customers and his relevant abroad experience make him an important resource within IBM, where he often is called as representative of the company in national and international events. Previously he worked in IBM Development in Endicott, as instructor in IBM's Chicago Education Center, as program Support Representative (PSR) in Manhattan and as a Customer Engineer (CE)
